

# Galvanised Steel End Stops

Galvanised Steel Sleeves / Stoppers

## Product Overview

Our Galvanised Steel End Stops are a robust and cost-effective solution for terminating galvanised wire rope assemblies. These stoppers are designed to be permanently fitted using a hydraulic press or a suitable swaging tool, creating a secure stop that prevents the wire from fraying.

The galvanised finish provides good corrosion resistance for general-purpose use, making them an ideal choice to use with galvanised wire ropes to ensure material consistency. **Please note that these end stops are not designed for creating load-bearing eyes.**

## Technical Specifications

The following table outlines the key dimensions and part codes for our range of galvanised steel end stops.

Wire Dia.	Diameter	Length	Part Code
3mm	6.27mm	6.38mm	GAES6.27x6.38
3mm	8mm	8mm	GAES3.08.0x8.0
5mm	22mm	22mm	GAES5.022.0x22.0
6mm	12.65mm	15mm	GAES6.012.65x15.0
6mm	22mm	14mm	GAES6.022.0x14.0
6mm	22mm	22mm	GAES6.022.0x22.0

**Disclaimer:** The information provided is for guidance and reference purposes only. These end stops are **not load-rated** and are not intended for lifting, load-bearing eyes, or safety-critical applications. A competent person must determine the suitability of this product for any given application. Dimensions and specifications are approximate and subject to manufacturing tolerances. All fittings should be thoroughly inspected before each use. Deacon Products assumes no liability for the misuse or misapplication of this information or our products.
